

HUBER Teleservice Optimal Plant Operation

Support from HUBER specialists for increased security and reduced operating costs:

- High operating reliability through preventive maintenance
- Continuous maximum operating efficiency
- Reduced reactive repairs
- Investment security

➤ HUBER HOC system for 24/7 online connection with HUBER service specialists in Germany

HUBER HOC system

The **HUBER Operation Control System (HOC)** can be retrofitted into new or existing machines and plants. The installation of a HOC system enables our service specialists to daily check via online connection all important operating parameters and immediately notify the customer in case of any deviation. The customer receives direct advice on what measures to take.

Check and results report

The customer automatically receives online reports on checked plant operating parameters.

Optimal machine and plant operation for the maximum benefit of the customer

Have all relevant operating parameters of your machines continuously monitored by HUBER service specialists and profit from a solution with a high economic benefit for customers!

- High operational reliability
- Investment security
- Minimised reactive repairs of wear and tear damage
- Reduced operating costs
- Long-term high product performance
- Certainty of optimally operating plants and maximum operating efficiency
