## HUBER Solutions for Sewer Systems

We have a fitting HUBER screen for any **pumping station**: our [Coarse Screen TrashMax®](#) even protects from biggest interfering substances and our robust [Multi-Rake Bar Screen RakeMax®](#) is the best option for deep channels and high solid loads. For small pump stations and manholes we have developed our vertical [HUBER Pumping Stations Screen ROTAMAT® RoK4](#) that simultaneously lifts, dewateres and compresses the removed screenings.

We offer several HUBER screens for **combined sewer overflows (CSO)**: Our [HUBER Storm Screen ROTAMAT® RoK1](#) is installed on the rear side of overflow weirs, while our [HUBER Storm Screen ROTAMAT® RoK2](#) is installed on their front. Both screens are provided with semi-circular perforated plates that are cleaned with screws and brushes. We also supply measuring weirs for Flow Monitoring and special flow restrictors and gates for Flow Control.

As [equipment for manholes and pits](#) we also supply various stainless steel components, such as Covers, Ladders, Step Irons, Guardrails, Access Aids and even complete Pre-fabricated Manholes.

Sewers also offer the possibility for the installation of solutions for [heating and cooling of buildings with wastewater](#) .
