HUBER Solutions for Micro-Screening and Filtration

Huber offers reliable and innovative solutions for advanced wastewater treatment.

This leads to a significant effluent quality improvement by addition of following treatment stages - for biologically treated wastewater and also for raw wastewater:

▪ FILTRATION OF BIOLOGICALLY TREATED WASTEWATER

For advanced wastewater treatment sand filters or micro-screens are added after biological treatment. [More...](#)

▪ FILTRATION OF RAW WASTEWATER

Mechanical pre-treatment is followed by micro-screening to remove very fine solids and (after precipitation and flocculation) even dissolved substances. In this way and under certain conditions, expensive biological treatment can be avoided. [More...](#)
